

Manage Internet Cloud Resources

Optional Activity: (1 – 2 hours)

Learn how to use AzCopy and Python to work with Azure Blob Storage. This exercise can be done individually or as a team. If done as a team, material learned may be included with the team presentation for additional points. Some of these exercises have not been covered as yet in the bootcamp, so this activity is optional. It is not required to complete all the tasks if this activity is attempted:

Getting started with AzCopy:

<https://learn.microsoft.com/en-us/azure/storage/common/storage-use-azcopy-v10>

How to upload and download blobs from Azure Blob Storage with Python:

<https://learn.microsoft.com/en-us/samples/azure-samples/azure-sdk-for-python-storage-blob-upload-download/upload-download-blobs-python/>

Use REST and AI to generate searchable content from Azure blobs:
